THE NUMBER 1 BEST SELLING LEISURE BATTERY IN THE U.K.

# THE NUMBER 1 BEST SELLING LEISURE BATTERY IN THE U.K.

Choosing the correct leisure battery is all about understanding your power usage. The Numax leisure range covers all situations, applications and levels of power usage depending on what you need from your battery.

Leisure battery performance is measured in cycles; these cycles are what determine their NCC rating. Battery cycles refer to the number of discharge/recharge cycles the battery is capable of when discharged by up to 50% between recharging.

*The biggest energy consumers in the average leisure vehicle are televisions, microwaves, kettles and hair dryers and motor movers.*

One easy way to conserve energy is to upgrade to LED lighting!

Part No.	V Ah	Dimensions	Cycles	NCC Rating
LV22MF	12V 75AH	272x175x225	75	C
LV26MF	12V 95AH	302x172x200	75	C
LV30MF	12V 105AH	330x175x230	75	C
