TRUE DEEP CYCLE AGM BATTERIES!

U.S. Battery's new **AGM DEEP CYCLE** batteries include updated features such as the use of **THICK POSITIVE ALLOY GRIDS** for exceptional corrosion resistance, **HIGH-DENSITY POSITIVE ACTIVE MATERIAL**, and **ADVANCED GLASS MAT SEPARATORS**. These components work together to maintain the battery cell structure during deep-cycling, limit acid stratification, and inhibit internal shorts.

The batteries also feature a **CARBON-ENHANCED NEGATIVE ACTIVE MATERIAL** that improves charge acceptance and cycling performance. In addition to designed-in vibration resistance and maintenance-free valve-regulated operation, U.S. Battery's new AGM design improves reliability and overall performance and delivers longer cycle life. The sealed Maintenance-Free line is engineered to deliver a deep cycle cost effective alternative to Lithium batteries.
