NUMAX

MARINE BATTERIES

Numax Marine – Enhanced Cyclic performance - Improved durability – Longer operating life

The all improved Numax Marine range delivers improved performance through:

- X frame positive grid – More durable and corrosion resistant. Improved electrical flow ensuring higher consistency of starting power
- Upgraded active material – Providing greater endurance throughout battery cycle life
- Low resistance envelop separator – Prevents internal short circuits between +/- plates
- Glass Mat – Added to the separator to support retention of active material on the plates and to further improve longevity in performance.
- Internal bonding – Ensures high protection against vibration

All Numax Marine batteries continue to be sealed maintenance free, with a specially designed cover that protects the battery from acid leakage and minimizes gassing. The Numax Marine range retains its ergonomically designed handle to provide easy transportation and installation.

Numax Marine batteries provide a longer life and improved cycle stability without compromising starting power, they provide minimal self-discharge and therefore can be safely stored for longer.

» MV - Standard

Part No.	V	Ah	Dimensions	MCA	Weight (KG)	Terminal
MV22MF	12	80	257x172x220	550	18.5	DT
MV27MF	12	105	353x175x190	740	20.6	DT
MV30MF	12	95	302x172x220	1000	23.0	DT

» XV - Dual Purpose

Part No.	V	Ah	Dimensions	CCA/MCA	Weight (KG)	Terminal
XV24MF	12	80	266x175x225	630/780	18.6	DT
XV27MF	12	95	302x175x225	690/860	20.6	DT
XV31MF	12	105	330x175x240	740/925	23.0	DT
XV35MF	12	120	330x175x240	900/1125	28.0	DT
XV50MF	12	140	506x182x233	800/1050	37.4	SAE
XV60MF	12	180	513x223x223	1000/1230	45.1	SAE
XV80MF	12	225	518x276x240	1150/1500	51.5	SAE

» XDC - Dual Purpose/Extra Cyclic

Part No.	V	Ah	Dimensions	CCA/MCA	Weight (KG)	Terminal
XDC24MF	12	80	257x172x225	500/640	19.2	DT
XDC27MF	12	95	302x175x220	600/770	22.5	DT
XDC31MF	12	105	330x175x242	650/830	23.0	DT
